SEPTEMBER 2022, Saint-Petersburg

Left the program due to political circumstances in Russia and transitioned to a Web Development program in Germany to continue studies.

Projects

Space Launch Telemetry Analyzer

- Python project leveraging OCR and computer vision to extract live telemetry from rocket launch broadcasts.
<https://github.com/sanitaravel/Space-Launch-Telemetry-Analyzer>

Mittweida Hiking Tours

- A TypeScript project using NEST.js and React + Vite to create and display walking tours around the city of Mittweida.
<https://github.com/sanitaravel/mittweida>

Real-Time Chat

- A scalable real-time chat application delivered as a Git monorepo. Two NestJS/GraphQL backend services (User Service and Chat Service) run behind a React/Apollo Client frontend, orchestrated with Docker Compose.
<https://github.com/sanitaravel/Real-Time-Chat>

SpaceX Upcoming Launches

- A dashboard, allowing to see the current planned launches of SpaceX, links to broadcasts, and upcoming events
<https://space-x-upcoming-launches.alexanderkoshcheev.me/>

COCO Mobile App

- A mobile app, based on requests from ad agency **COCO One**
https://github.com/sanitaravel/coco_mobile_app

Extracurricular Activities

Charity Musical – *The Lion King* – "School" Intellectual"

2018-19, Moscow

Performed in a school charity production of *The Lion King* to support fundraising initiatives (80 thousand rubles were collected). Strengthened teamwork, communication, and presentation skills through rehearsals and live performances.

Volunteer – Nursing home in Ivanteyevka near Moscow

SEPTEMBER 2015 - JUNE 2022, Moscow

Collected and organized clothes and other material donations for residents. Contributed to community support initiatives and gained experience in responsibility and teamwork.

Interests

Formula 1 · Gaming · OCR & Machine Learning · Web Development.
